A STATISTICAL SUMMARY

A 72-15

July 1972

Foreign Trade of the East European Communist Countries

1960-70

A Statistical Summary

Introduction

This compilation of statistical information on the foreign trade of the East European Communist countries was prepared as a research aid for analysts working on the foreign trade of these countries. It contains the following tables: geographic distribution of trade turnover of the East European Communist countries combined and of individual countries for the years 1960-70; exports and imports of the individual East European Communist countries with the Communist countries and with the non-Communist countries for the years 1960-70; commodity composition of exports and imports of each of the East European Communist countries for 1960, 1963, 1965, 1967, and 1968-70, except East Germany (data on the commodity composition of East Germany's trade are available only for the years 1960 and 1965); and commodity composition of exports and imports for 1960 and 1965 of the East European Communist countries combined.

The area breakdowns used in the tables are as follows: *East European Communist Countries*: Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Romania; *Far East Communist Countries*: Communist China, North Korea, and North Vietnam; *Other Communist Countries*: Albania, Cuba, Mongolia, and Yugoslavia. The non-Communist world is broken down into the *Developed Countries*: Western Europe (except Portugal, Spain, and Greece), the United States, Canada, Australia, New Zealand, Japan, and the Republic of South Africa; and the *Less Developed Countries*: Asia (except Japan), Africa (except the Republic of South Africa), Latin America (except Cuba), and Spain, Portugal, and Greece.

The data in this handbook have been compiled primarily from official yearbooks and monthly statistical bulletins published in the various East European Communist countries. The principal sources of statistical data on foreign trade of these countries are listed in Appendix B. Where official data are not available for trade with non-Communist countries, data from the trading partners, as compiled by the United States Department of Commerce, have been used. All data are given in current US dollars converted from national currencies at official rates of exchange (see Appendix A). All six East European Communist countries report export data on an f.o.b. basis (exports include re-exports). Hungary's imports are recorded as c.i.f. Bulgaria, East Germany, and Poland report imports on an f.o.b. basis as does Czechoslovakia, but it is believed that Czechoslovakia's imports are actually recorded on a c.i.f. basis. Romania does not indicate the basis on which its imports are recorded, but imports from non-Communist countries are believed to be c.i.f.

The symbol "—" is used when relevant information is not available. Within each table, data for the individual countries have been rounded. Because of rounding, components may not add to the totals shown.
